

May 26, 2020, TRC Conference Call Chat Box Record

00:42:52 Franceen.Gonzales: Is there a way to share screen and show the CR that is being discussed?

00:44:15 Dewey Case: Unfortunately, we don't have a typed agenda. This link will take you to the schedule: https://cmahc.org/documents/5-22-20_CMAHC_TRC_Call_Schedule.pdf

00:45:05 Dewey Case: This link will take you to the CR pages: <https://cmahc.org/view-change-requests.php> You'll have to search to see the CR in discussion.

00:45:44 Dewey Case: Clarification: we have a typed agenda, just not a presentation for it.

00:45:58 Franceen.Gonzales: Thank you

00:59:38 ronald.george.ext: Are you not then changing the other section?

01:02:35 ronald.george.ext: Ron George The TSC had trouble understanding how specific numbers were arrived at. The MAHC is based on science.

01:05:13 13146: I agree that the MAHC is based on science, not something that is arbitrary. This does not have scientific justification for the 10%. If it is not science based then it should not be accepted

01:05:33 13146: and if it is a no vote then the issue is moot and it does not need to be re-numbered and moved.

01:06:29 13146: because of the lack of scientific data, that is why the TSC recommended no (on both parts of this CR)

01:24:04 Allen Clawson:For instrumentation and devices such as flow meters NSF does not require listing if the material of construction is listed for drinking water and/or if the total area exposed to water is less than 100 sqin (NSF-50 3.1 and Annex A)

01:27:09 Tom Kuechler: NSF 61 is also mentioned in 4.7.1.7.1.2.1

01:29:55 Franceen.Gonzales: I have to join another call. I will try to return. Thanks.

01:35:41 Dewey Case: Not sure what's going on with my system.

01:36:04 Dewey Case: We have one person on their speaker phone via their cell. I think that may be the issue.

01:36:26 Dewey Case: But it's not happening with others, so it may be my connection.

01:54:15 Lane HOY / PCFR PoolCop: It's worth noting: similar to the CMAHC Cr process, NSF standard text is updated thru the joint committee process, immediately under a CCS and then standard revision. New technologies are being accommodated and standards updated.

02:19:36 Lee: Hey everyone, I have a Board of Supervisor Meeting that I have to attend. Greta job, so far.

02:23:06 Kboyer: Sorry, everyone. Computer crashed. Not sure how long I talked through it but back on now.

02:28:26 Miklos Valdez: Agreed
